Message from Chair

In October I was delighted to participate in my first Executive Committee meeting as Chairperson of the STAR IDAZ International Research Consortium (IRC). The world is continuing to face emerging and re-emerging health challenges and zoonoses, alongside the challenges posed by climate change, so these meetings with other research funders and stakeholders are more important than ever.

In many parts of the world there are increasing problems with transboundary animal diseases and zoonoses, and most of these problems that are occurring around the world key directly into the STAR IDAZ priorities, including bovine tuberculosis, African swine fever, foot-and-mouth disease, brucellosis, influenza, mycoplasmas and zoonoses. These remain priorities for us. The Executive Committee meetings provide a platform for members to explore opportunities for sharing research resources and information

on funding mechanisms, to grow our global network of experts and researchers and institutions working together to combat these infectious diseases, and improve animal welfare and ensure food security for a growing population.

As 2024 comes to a close we have 36 STAR IDAZ IRC Partners. I am looking forward to growing not only our IRC Partnerships in 2025, but also our Regional Networks whose collaborations are invaluable. Together

we can further strengthen our common objectives, utilizing a One Health approach among others to bring about animal disease control.

I wish everyone a peaceful end to 2024 and my very best wishes for a collaborative and inspiring 2025.

**Maryam
Muhammad**
Chair, Executive
Committee, IRC
